# ABOUT US

ANTI-THEFT  
SOLUTIONS | **FORS**

Fors France is a French SME operating in over 30 countries, specializing in the design and distribution of retail security solutions that effectively reduce shrinkage.

With over 40 years of close collaboration with major retailers and specialty stores, Fors France has become a leading expert in retail theft prevention.

Today, the company offers the widest range of protective cases and EAS antenna gates, with varying degrees of protection.

It has also developed a range of security accessories for self-service products.

To maintain its competitive edge and leadership in innovation, Fors prioritizes intellectual property protection through registered designs, patents, and trademarks.

# ANTI-THEFT SOLUTIONS

# FORS

Reactivity and flexibility are key words at Fors, as they have been from the start.

Knowledge of the market : We have expert knowledge in the security and anti-theft domains.

Robustness : We create durable and robust products.

Strengths : We are excellent at plastic processing, metallurgy, IT, electronics, and design.

Worldwide : We are present in more than 30 countries and are developing fast in emerging countries.

French manufacture : Our safe cases, antennas and listening stations are manufactured in France.

**100% french compagny**  
since 1984

Constant innovation: Thanks to our innovative and customer-oriented mindset, we will create the perfect-fit product that meets your requirements.

At the forefront of technology from conception to development, we create tomorrow's products for you.

**14 patents**  
Fors

Our sales team partners with you: We will support you and guide you with the mass market retailer brands throughout the procurement process, on both the technical and financial aspects.

Our sales team listens to you: your feedback is precious to our Research and Development department team in their design process.

**Reactivity | Flexibility | Partnership**

Fors has built a solid reputation of reliability, constant innovation and quality French manufacturing throughout the years, for our flagship products such as the safe cases, the antennas and all of

our products range. We are proud to commit to these values and the work ethic they represent in today's market.

# ANTI-THEFT RF GATES

## ANTI-THEFT GATES

Our Radio-Frequency EAS gates have been specially designed to adapt to the most challenging environments.

With its **SmartPulse** technology, the EAS Gate analyzes and detects interfering elements while optimizing detection.

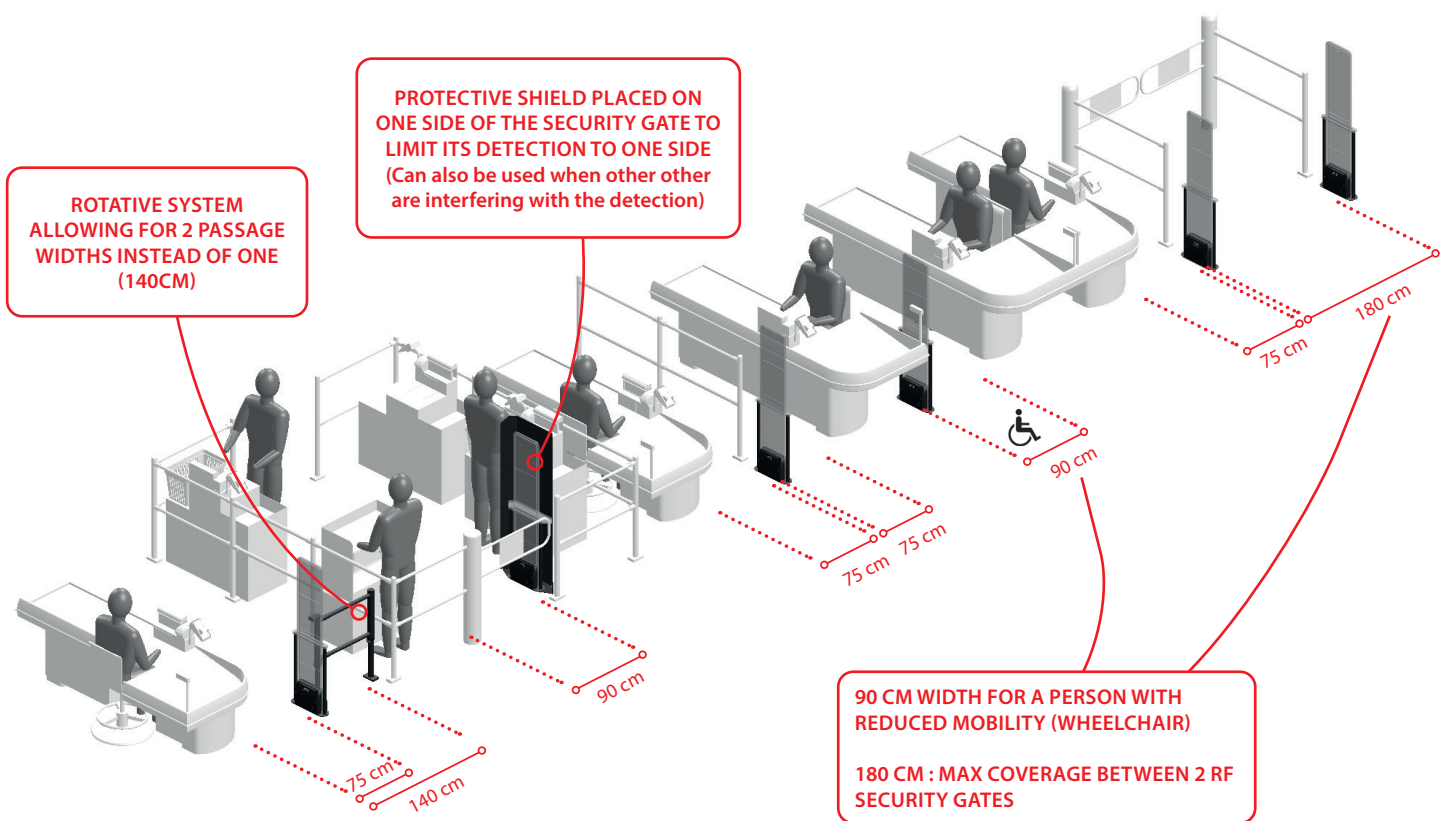

This technology enables a **detection distance of up to 2.20m** between two EAS gates (with the Forstag Round).

Once installed, the antenna adapts itself to its environment, limiting maintenance costs.

It fits perfectly into supermarkets/hypermarkets, DIY stores, convenience stores or shopping malls...

The EAS Gates in this lineup operate on the **8.2 MHz radio frequency**, the international frequency for EAS security hard-tags and EAS self-adhesive labels. They are compatible with all brands of anti-theft labels/tags.

## EXAMPLE OF RF IMPLEMENTATION OF MULTIPLE CHECKOUTS (HYPERMARKET) :

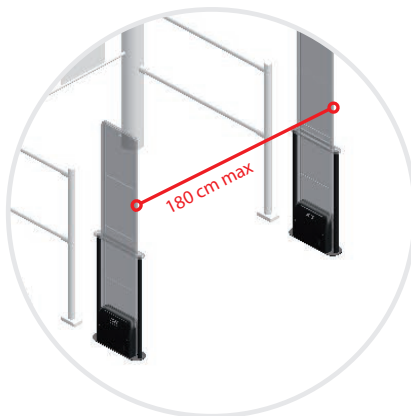

# ANTI-THEFT RF GATES

## ADDITIONAL INSTRUCTIONS :

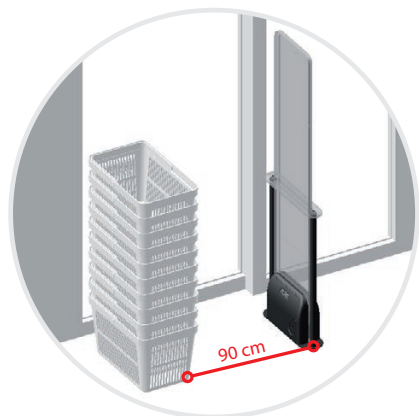

Leave **20 cm** between an EAS gate and the guide bar.

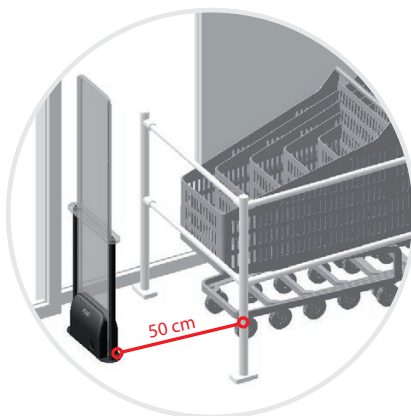

For an optimal detection between two gates, do not exceed **180 cm**.

Leave at least **90 cm** between an EAS gate and the checkout scanner.

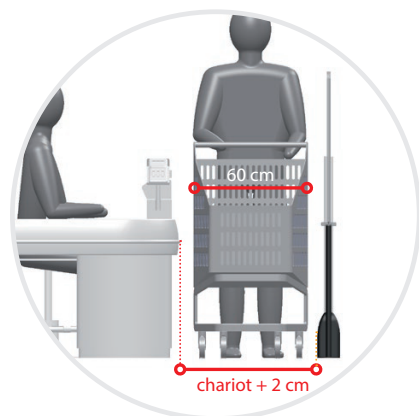

Leave **90 cm** between the EAS Gates and baskets.

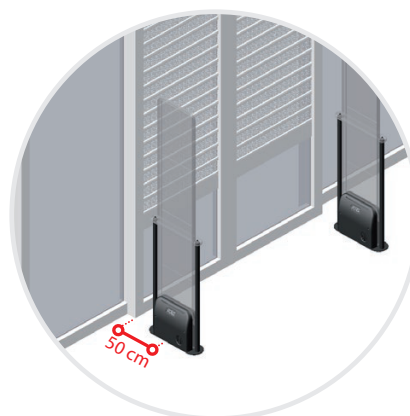

Leave **50 cm** between the EAS Gates and trolleys.

Position the antenna in line with the guidance gates.

Position the security gate to clear a passage for the trolley

Leave **50 cm** between the gates and the automatic door or metal shutter.

# ANTI-THEFT RF GATES

## RF MONO RANGE (8,2 MHz)

Our RF EAS security gates were specially designed to adapt to the most sensitive environments.

With its SmartPulse technology, the security gate analyzes and detects interfering elements while optimizing detection.

This technology can reach a detection range of up to 2.20m between two EAS gates (with the Forstag Round).

Once installed, the EAS security gate automatically adapts to its environment, reducing maintenance costs.

It integrates perfectly into supermarkets/hypermarkets, DIY stores, convenience stores, or shopping centers...

These EAS security gates operate in the 8,2 MHz radio-frequency technology, the international frequency for EAS hard-tags and self-adhesive labels.

## AVAILABLE OPTIONS

### PROTECTIVE SHIELD

Protective shield preventing detection on one side of the security gate and isolating from interference.

### REVERSE PASSAGE ALARM

Audible alarm when an individual passes through the gates in the wrong direction for a dedicated entry or exit.

### PROTECTIVE COVER

Protects the gate's lower base against lateral impacts.

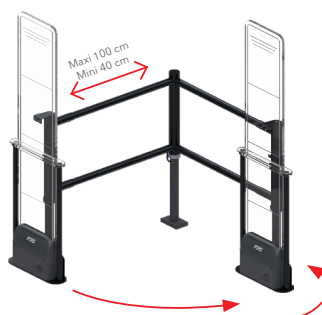

### CLOSED CHECKOUT ALARM

Audible alarm when an individual passes through a gate adjacent to a closed checkout.

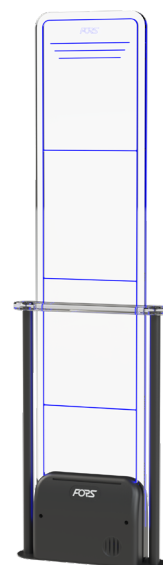

### PIVOT GATE

From 1 passage unit to 2.

### TROLLEY PROTECTION

Metal tubes and PMMA slide.

# ANTI-THEFT RF GATES

## RF DUO RANGE (8,2 MHz)

Symphony plus radio-frequency security gates are perfectly suited to retail stores, allowing optimal detection between two gates.

With its **RxTx** technology, antenna gates work in pairs by transmitting and receiving.

The Symphony Plus range consists of two models: **Symphony Plexiglas** and **Symphony Aluminum**. The technology and operation of both antennas are identical, with the difference lying in their design.

This technology **can reach a detection range of up to 2.20m between two EAS gates** (with the Forstag Round).

These EAS security gates operate in the **8,2 MHz radio-frequency technology**, the international frequency for EAS hard-tags and self-adhesive labels.

# ANTI-THEFT AM GATES

## AM RANGE (58 kHz)

Specially developed for pharmacies and retail stores looking for small, self-adhesive labels, the AM range has already been installed in several hundred stores.

With its **RxTx** technology, antenna gates work in pairs by transmitting and receiving.

A **Mono** version of the antenna is also available.

This technology **can reach a detection range of up to 2.20m between two EAS gates.**

The antennas in this range operate in the **58 kHz acoustic-magnetic technology**, the international frequency for hard and self-adhesive labels.

They are compatible with all brands of anti-theft tags and labels.

## METALGUARD AND HYPERGUARD GATES : METAL DETECTION AND BOOSTER BAGS (ARMORED BAGS)

This range complements standard EAS gates by providing effective detection of metal-lined booster bags and concealed items.

### FEATURES

- Metal/HyperGuard systems detect metallic objects in bags, clothing, strollers, and other containers.
- Door filter: Enables installation as close as 70 cm to automatic doors, reducing false alarms. This eliminates false alarms due to moving doors.

**BUZZER ALARM**  
**OPTIONAL PAGER**  
**OPTIONAL STROBE LIGHT**

### ASSOCIATED CONTROLLER

- MetalGuard antennas are connected in series to a controller.
- Supports remote diagnostics and maintenance via RJ45 Ethernet connection.
- Up to 12 Metal/HyperGuard and ApparelGuard antennas for one controller

**ASSOCIATED

# EMERGENCY CALL BUTTON

## Emergency call button

The emergency call button is typically installed at checkout counters, allowing staff to discreetly alert security in case of a threat. Security receives the signal instantly, can take action against the aggressor and quickly relieve the cashier.

AC-BOUT2

- Range : 100m (without obstacles)
- Power : 10mW
- Battery Life : 15 000 clicks
- Power Supply : 1 23AE 12V battery

## Staff Call Button

This call button is positioned on the shelf or at strategic points in your sales area. It allows customers to request assistance when no staff member is nearby. The sales assistant instantly receives the call and can quickly go to the aisle to advise your customer.

AC-BOUT1  
Waterproof

## BEEPER

AC-BIP

The beeper enhances service efficiency by streamlining staff communication and response times.

Alerts are delivered via discreet vibration or audible signal. The beeper also lets you know where the call is coming from (production point). Its touch screen and intuitive menu make it extremely easy to use.

- Battery Life : 96 hours
- Alerts : Vibrations & Ringing
- Waterproof: Optional

## DISPLAY

The display station is compatible with all Fors call buttons. It displays the first two calls and the number of calls waiting.

- Alert : Ringing
- Capacity : 99 buttons
- Power Supply : Power Plug

AC-AFF

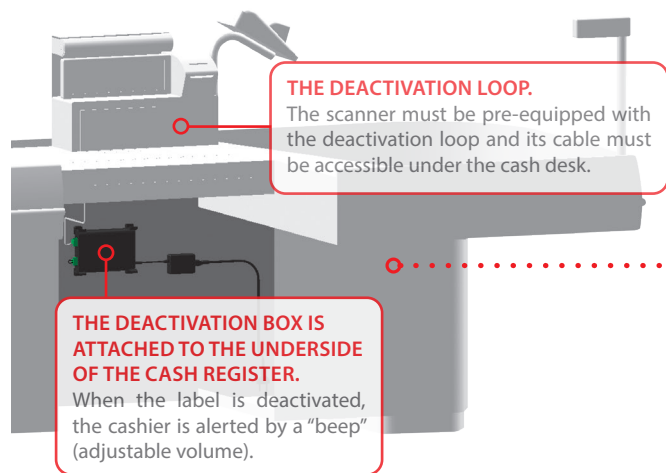

FORS Reference	Product Name	Dimensions (mm) W x H x D

AC-BOUT2	Staff Call Button	60 x 67 x 20
AC-BIP	Beeper (Watch)	50 x 40 x 10
AC-AFF	Display	320 x 100 x 40

# EAS LABEL DEACTIVATORS

Fixed deactivators are mounted beneath the checkout counter and connected to the scanner or a dedicated pad, enabling seamless deactivation of RF or AM labels.

## HOW DEACTIVATION WORKS.

The deactivation loop surrounds the scanner, providing a deactivation range of approximately **15 cm**.

This layout enables the cashier to maintain her work rhythm, as the label is automatically deactivated when the product is scanned. A configurable beep notifies the cashier when a label has been successfully deactivated.

## GATES & GUIDING

# FORS

### EXIT WITHOUT PURCHASE / EMERGENCY EXIT

The manual "no-purchase exit" gate can be configured to open in either direction.

The "emergency exit" gate has a notch to allow passage in an emergency.

### GUIDE BARS

Guide bars help organize store entrances and exits, self-checkout areas, and checkout lanes.

The assembly of intermediate posts, end posts and guide bars between one and two meters enables precise adaptation to all types of store configuration.

### GUIDE RAILS

Floor-mounted guide rails protect store fixtures from shopping cart collisions.

Modular elements allow easy planning and installation.

Made of stainless steel, they can be used indoors or outdoors.

### ANTI-COVID SHIELD

Paired with standard guidance systems, this Plexiglas shield prevents droplet transmission between adjacent checkout stations.

## GATES & GUIDING

# FORS

### AUTOMATIC GATE

The automatic gate is the ideal solution for securing the entrance to your store. It opens automatically when a customer approaches.

### OPPOSITE DIRECTION ALARM OPTION

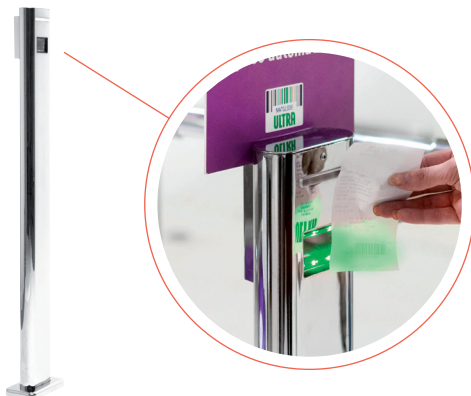

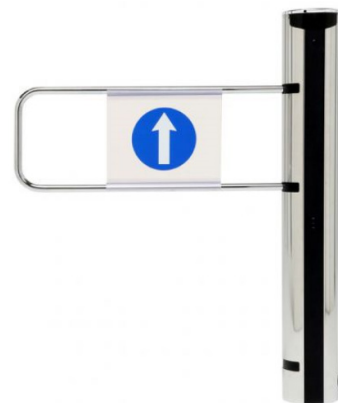

If someone tries to pass through the gate in the opposite direction, an alarm is triggered.

*Panel customization possible*

### NO-PURCHASE EXIT

The automatic "no-purchase exit" gate can be remotely operated by staff from the reception desk.

### SELF-SERVICE SOLUTION

The self-checkout solution opens the gate on presentation of the barcode printed on the receipt.

This system reduces theft and guarantees a high level of security at self-checkouts.

# FORSTAG RANGE

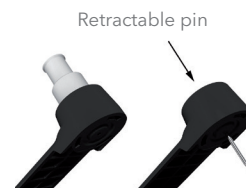

## HYGIENE AND SECURITY : RETRACTABLE PIN

We all know that handling security tags poses a real safety and hygiene issue for store teams.

In the open position, the **FORSTAG** tag is invisible, this innovation allows staff to handle the product without physical risk.

To secure the **FORSTAG**, simply press the button.

Equipped with a foldable hook, the **FORSTAG Blister** is designed to adapt to various blister product packaging.

Its compact size allows it to fit easily into existing shelves.

### FORSTAG BLISTER

FTBLI - Foldable hook

Thanks to its metal cove, the **FORSTAG Padlock** range is the ideal solution for protecting leather goods, fashion accessories, sports accessories, strollers, shoes, etc.

The metal cove guarantees maximum security for your items, making it impossible to cut the anti-theft tag with scissors or simple tools.

### FORSTAG PADLOCK 2

FTPL2 - Large cove

### FORSTAG PADLOCK 3

FTPL3 - Narrow cove

# ANTI-THEFT CLAMP

# FORS

**FORSTAG**  
INNOVATIVE SOLUTIONS

## FORSTAG CLAMP

OPENED  
POSITION

**FORS**  
exclusive  
Patent

CLOSED  
POSITION

The **FORSTAG** Clamp effectively secures all your packagings with aluminum and other materials that can fit into its jaws. It is the **world's first security tag** to comply with food safety standards.

Its clamping jaws allows for a **total grip** on packagings.

Current model secures products from **0.1 to 1mm thick**.

For other thicknesses, please contact us.

### SPINDLE OPENING

Possibility to display the security tag on a peghook.

### CLAMPING LEVER

Easy to secure

### TOTAL GRIP

Lateral jaw openings for optimum pack grip.

### MAXIMUM SECURITY

Tamper-resistant pin design prevents intrusion with cutting tools.

### COMPLIANCE WITH FOOD STANDARDS

304L stainless steel retaining plates: Anti-corrosion and resistant to ambient humidity, the anti-theft tag can be washed.

### ANTI-THEFT DETECTION

RF, AM, RFID technology

### DURABLE

Rustproofing treatment on metal parts (axes and springs).

## FORSTAG CLAMP 3 ALARMS

This model of the **FORSTAG** electronic Clamp has 3 alarms :

- Integrated RF or AM ferrite
- Alarm via pressure sensor
- Built-in alarm when passing through anti-theft gates

- Integrated alarm buzzer
- Interchangeable CR2032 battery
- Folding hook for spindle
- Operating LED indicator

exclusive  
Patent

## ALARMED FORSTAG ALCOHOL

The **ALARMED ALCOHOL FORSTAG** allows you to reach an optimal security level for your bottles.

This model of the **electronic Alcohol FORSTAG** has 3 alarms:

1. Embedded Alarm when crossing the store's security gates
2. Alarm via the RF or AM coil
3. Alarm via pressure sensor

- Retractable Cap
- Embedded Alarm Buzzer
- Interchangeable CR2032 battery
- Operating LED indicator

### QUICK AND SIMPLE

Ergonomic design ensures a fast and easy application.

### METALLIC STRAP

Available as an option for maximum safety.

### SECURE NOTCHING

Protected notching prevents tool insertion into the rack.

### MAXIMAL DETECTION

RF or AM coil for maximum detection through your EAS gates.

### RETAINING RIB

For maximum grip on the bottle.

### ADJUSTABLE CAP

FTU - Fits all alcohol bottles.

FORS Reference	Product Name	Available Options	Technology	Security	Packing	Carton Weight
FTA	Forstag Alcohol	Reinforcement strap, XS version	RF, AM or RF+AM	Normal Lock, Super Lock or Hyper Lock	100	3 kg
FTAB	Forstag Alcohol with cap	Reinforcement strap				4,50 kg

FTUCA	Forstag Alcool Universal with Alarm	Reinforcement strap	RF or AM		20	1,10 kg

## FORSTAG WINE & CHAMPAGNE

Because your Wine and Champagne sections deserve a refined presentation, we have developed discreet yet effective anti-theft tags.

### UNIQUE LATCHING POSITION

The fixed-latch principle ensures optimum clamping of the **FORSTAG** on the bottle.

### COMPACT

Compact design preserves shelf space and fits neatly in wine crates. The transparency of the Wine and Champagne **FORSTAG** does not alter the visual appearance of the bottle.

### FEATURES

- All in one system.
- Fixed-latch system ensures consistent, secure placement, no manual adjustment needed.
- Time-savings during setup and removal at checkout.
- Does not damage the bottle.
- Available with Normal Lock or Super Lock opening, integrates RF or AM coil.
- Discreet and stylish.
- **FORSTAG** Retractable pin.

CT3

## CAN-TAG RANGE

### GUARANTEED RETURN ON INVESTMENT

- By eradicating the growing trend of in-store can consumption.
- By preventing the theft of cans freely displayed in your store.

*Quick : 1 click necessary to secure the can*

### Simple opening

*The internal spring makes the opening of the CAN-TAG™ easy*

## ICE CREAM ANTI-THEFT EAS TAG

Prevents both theft and in-store tampering of ice cream tubs.

Its transparent design ensures full visibility of product labeling and branding.

It is compatible with all ice creams in tubs such as Häagen-Dazs, Ben and Jerry's, Magnum, Snickers, Milka, Talenti and Nutella.

## PEG LOCK

### PEG HOOKS PROTECTION

Prevent the theft of your products displayed on peg hooks by securing them with the BlisterKey and Peg Lock.

Equipped with a manual detacher, the salesperson will be able to hand the product to the customer very quickly.

For an optimal protection of your products on pegs, the peg lock can be combined with the **PROTECTPIN** (p35).

SPINTAG  
SOLUTION

FORS

FORS  
exclusive  
Patent

Effectively fight against  
mass theft...

...While still promoting  
self-service !

## A SIMPLE, EFFICIENT SYSTEM

For thieves, removing all the products displayed on a peg can be easy,  
a simple sweep into a bag, and it's done in just a few seconds.

**SPINTAG** gives you the ability to delay the collection of displayed retail items in-store,  
and to prevent impulse thefts and organized thefts resold on parallel markets.

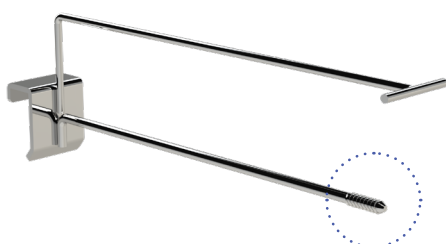

Annihilate mass theft  
by eliminating spindle sweeping

The **SPINTAG** system is comprised of 2 elements :

A specialized spindle on  
which **SPINTAG** equipped  
products are displayed.

AND

An integrated button on the tag, containing  
the patented **SPINTAG** technology, allowing  
you to secure your displayed products.

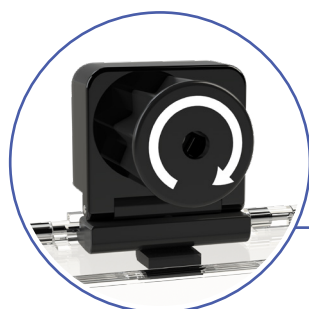

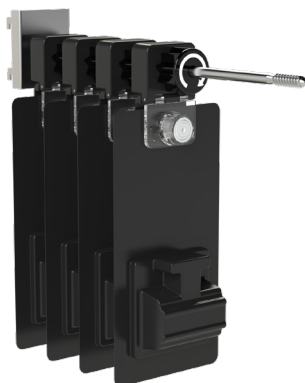

## SPINTAG FORS Blister

We developed a version of the **FORSTAG** Blister with a hinged **SPINTAG**, designed to make it easier to grip and to guide the tag through the peghook.

The retractable **FORSTAG** pin helps prevent injuries and allows for simple and quick securing and opening.

## SPINTAG FORS Safers

The application of the **SPINTAG** system on security safers includes the presence of a hinge to facilitate gripping and guiding the tag through the peghook.

This hinge also allows the safer to rotate on its vertical axis, making it possible to view the back of the secured product.

**FORS** has a compatible range to meet your needs.

## SPINTAG SOLUTION

### SPINTAG Spider

The **SPINTAG** Spider hook is a simple system to set up, allowing for easy, quick, and secure positioning on spiders.

Its operating mechanism ensures the spintag hook remains permanently held within the spider's cables.

1 Grab the spider's cable with the tag's hook

2 Press it down until it clicks

3 The spider is secured, you can now hang it

### SPINTAG Hard-Tags

We have developed a **SPINTAG** system application for hard-tags, combined with the **FORSTAG** system :

A built-in retractable pin prevents pin loss and protects staff from injury. The **SPINTAG** simplifies stock management and handling.

## A SECURE HOOK FROM END TO END

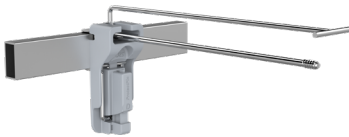

For maximum protection of your products on peghooks, the combination of **PROTECTPIN** and **SPINTAG** fully secures your items on the display furniture. This solution is specifically designed to prevent thieves from removing the entire peg equipped with the **SPINTAG**.

Your hook is  
now secured  
on its support

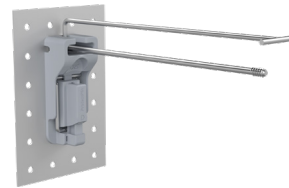

**PROTECTPIN** adapts to all  
types of furniture and peghooks!

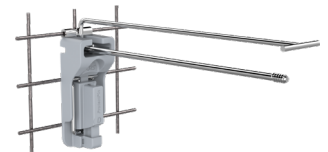

Load Bar

Slatted panels

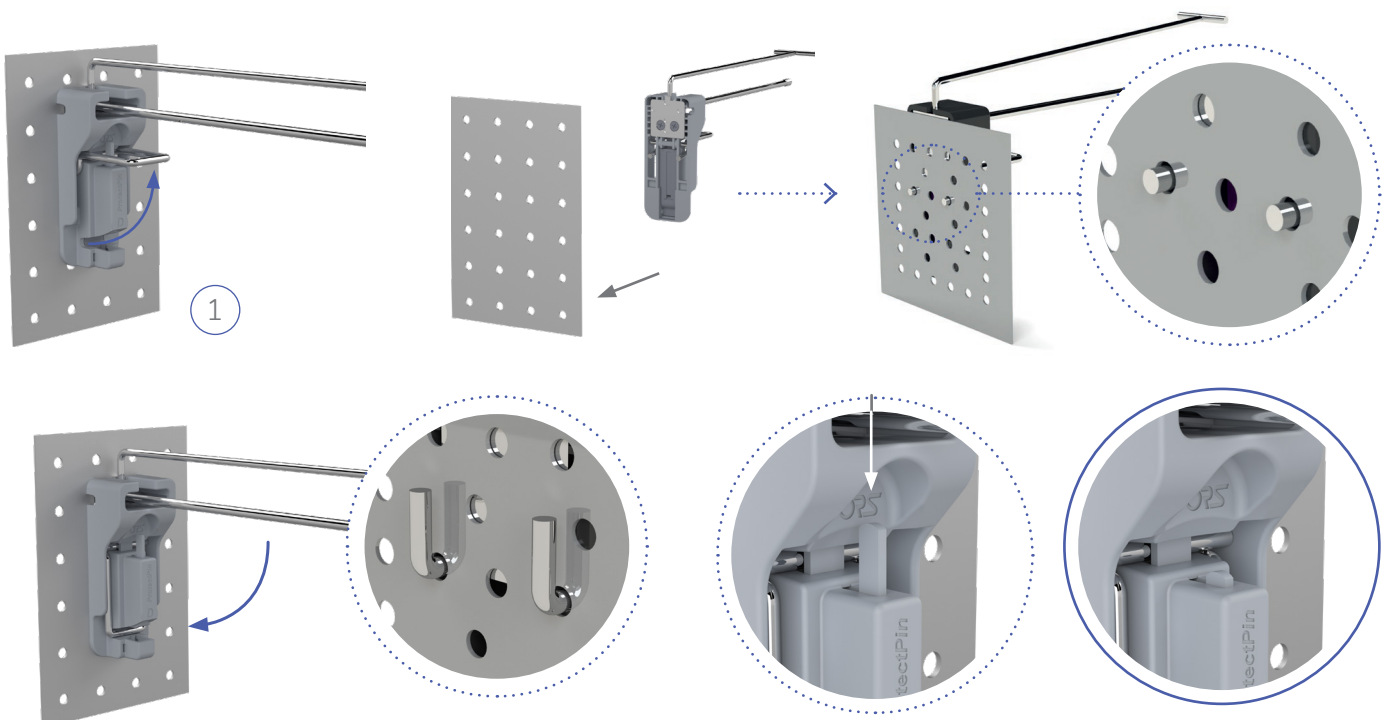

Perforated plate

Grids

The **PROTECTPIN** technology is an easy to setup system, allowing for easy, quick, and secure positioning. Follow these simple steps :
