ABOUT US

Fors France is a French company specialized in manufacturing and selling anti-theft solutions that effectively prevent and stop inventory losses.

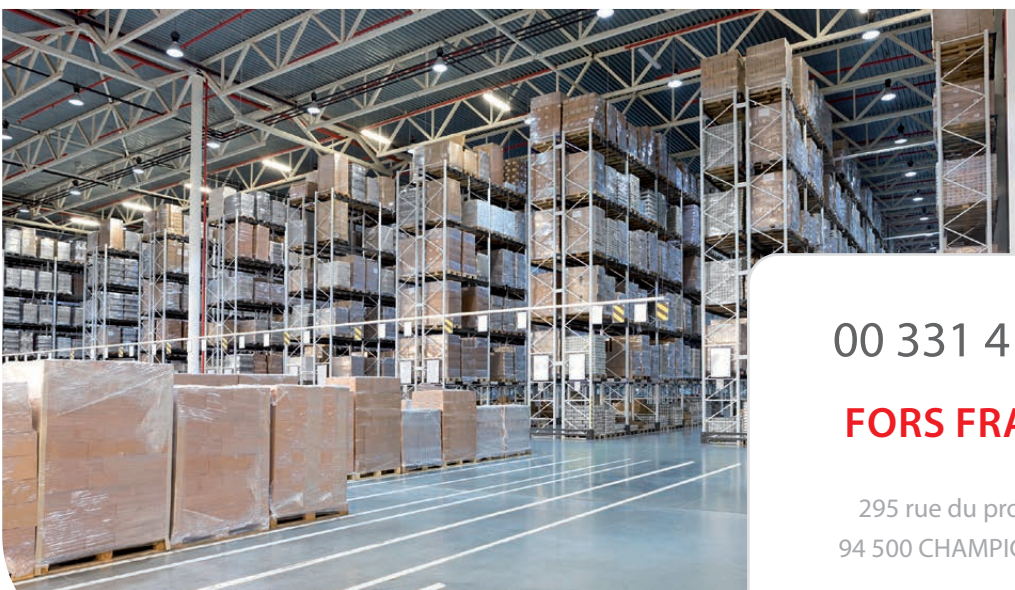

We are present in 30 countries.

Thanks to a close collaboration with mass-market retailers and specialized shops established over 35 years, Fors France is a key specialist of all in-store shoplifting related issues.

We offer the widest range of anti-theft antennas on the market, with different levels of protection.

We also develop security accessories designed for self-service.

In order to keep our competitive edge and our pole position on the market in terms of innovation, we give the utmost importance to the protection of our products through patenting, models and drawings registration.

3 000 m² of warehouse located in and around Paris.

00 331 4177 6200

FORS FRANCE SAS

295 rue du professeur Milliez
94 500 CHAMPIGNY SUR MARNE

Since 1984

Anti-Theft Solutions

Reactivity and flexibility are key words at Fors, as they have been from the start.

Knowledge of the market : We have expert knowledge in the security and anti-theft domains.

Robustness : We create durable and robust products.

Strengths : We are excellent at plastic processing, metallurgy, IT, electronics, and design.

Worldwide : We are present in more than 30 countries and are developing fast in emerging countries.

French manufacture : Our safe cases, antennas and listening stations are manufactured in France.

100% french compagny
since 1984

OUR PATENTS

Constant innovation: Thanks to our innovative and customer-oriented mindset, we will create the perfect-fit product that meets your requirements.

At the forefront of technology from conception to development, we create tomorrow's products for you.

14 patents
Fors

THE FORS TEAM

Our sales team partners with you: We will support you and guide you with the mass market retailer brands throughout the procurement process, on both the technical and financial aspects.

Our sales team listens to you: your feedback is precious to our Research and Development department team in their design process.

Reactivity | Flexibility | Partnership

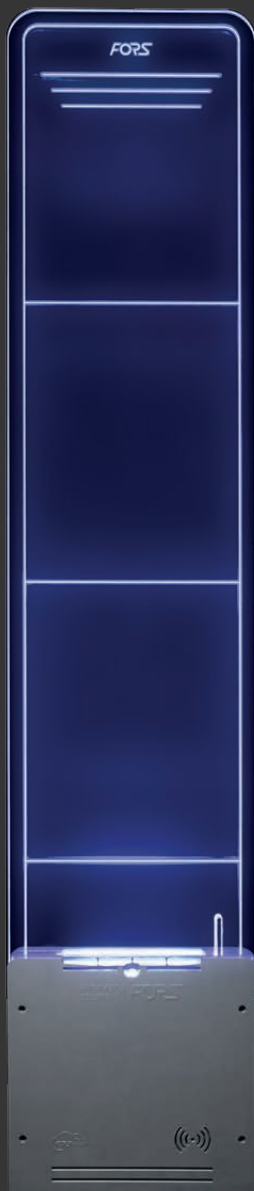

OUR CREDENTIALS

Fors has built a solid reputation of reliability, constant innovation and quality French manufacturing throughout the years, for our flagship products such as the safe cases, the antennas and all of

our products range. We are proud to commit to these values and the work ethic they represent in today's market.

EAS SOLUTIONS

GENERAL PRESENTATION

ANTENNAS

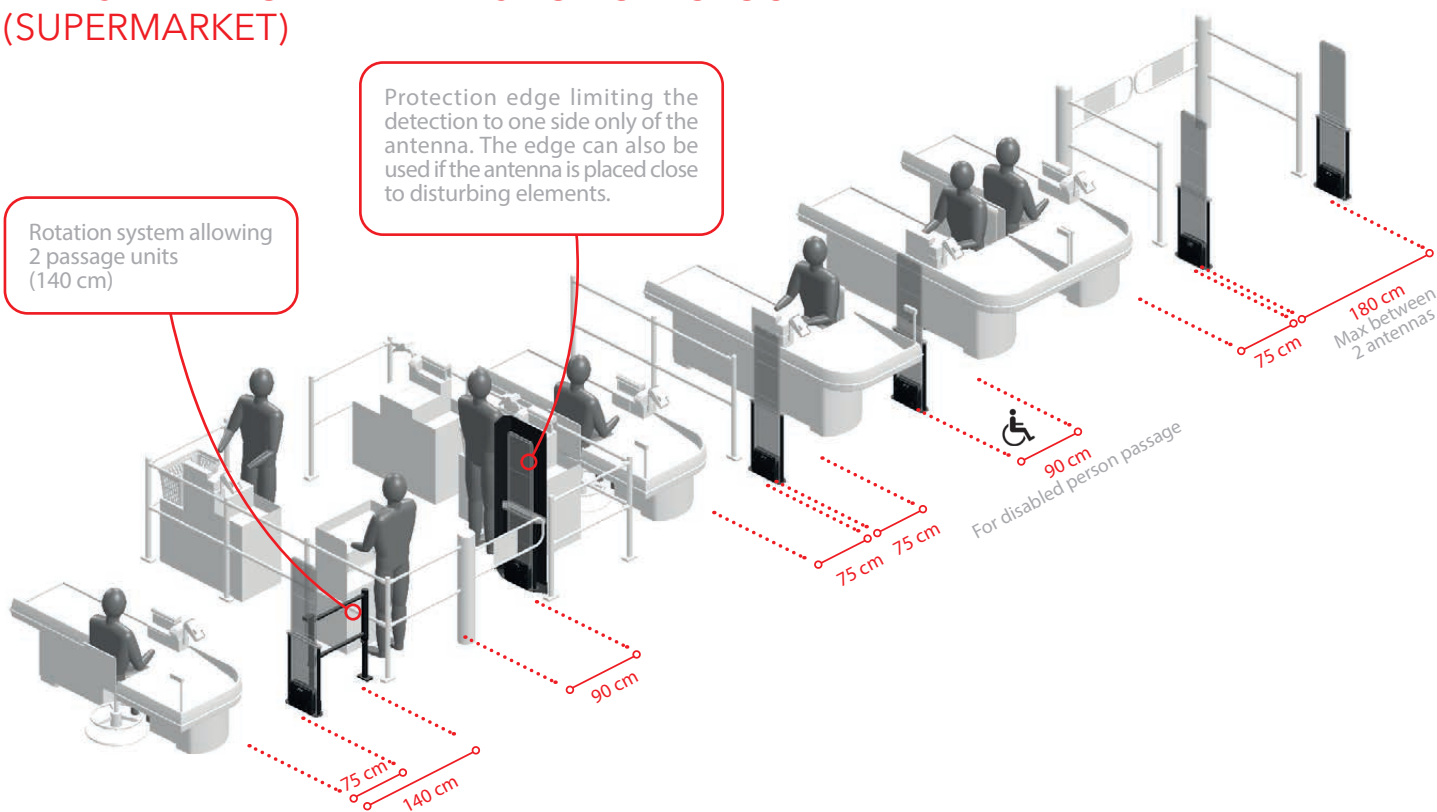

For over 30 years, Fors France has been considered a leader in in-store anti-theft security.

Thanks to their knowledge of the products on the ground, our team is available to support you in your projects.

Always thriving for excellence, our RF and AM antennas include the latest generation of DSP so as to protect your products as well as possible.

Almost 3 500 stores have already been equipped with the Fors antennas in France and around the world.

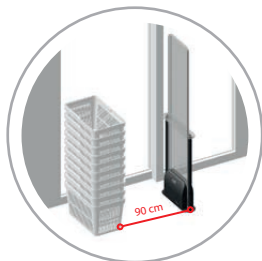

RF INSTALLATION EXAMPLES FOR CHECKOUT (SUPERMARKET)

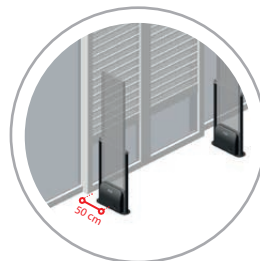

Installation recommendations

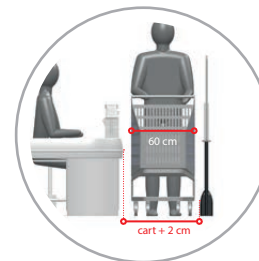

Leave **20 cm** between the antenna and the guidance bar.

Leave **90 cm** between the antenna and the protected baskets.

Leave **50 cm** between the antenna and the automatic door.

Place the antenna to allow enough space for a cart.

EAS SOLUTIONS

GENERAL PRESENTATION

ANTENNAS DETECTION

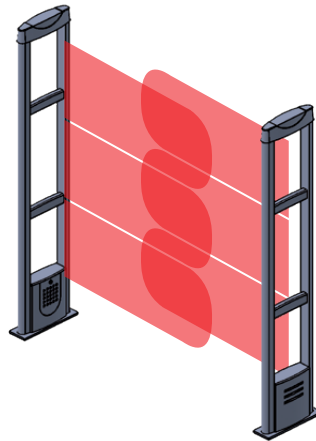

For the RF and AM technologies, there are 2 types of antennas :

- **DUO antennas :**

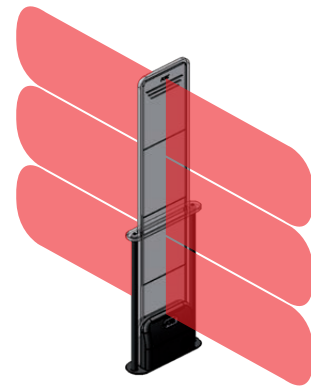

They work in pairs and the detection field is solely between the antennas.

- **MONO antennas :**

They can be installed as standalone or in series. They detect on either side of the antenna.

Duo antennas

Mono antenna

For all your projects

Contact our sales department at :

00 331 4177 6200

and by email : contact.commercial@fors.fr

Our team will study the best set-up with you to guarantee maximum security for your products.

Our wide network of certified technicians ensures your installations maintenance.

Installation in mainland France.

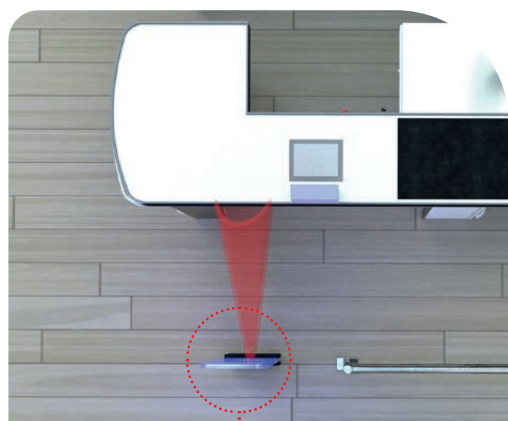

EAS SOLUTIONS

FORSBOX SOLUTION FOR ORCHESTRA ANTENNAS

FORSBOX

Interconnected to the antennas, the FORSbox allows them to be connected to the Internet.

PEOPLE COUNTER

The people count device offers a measurement of the people flow at the accesses it is set up in. See p. 24 for more information.

CLOSED CHECKOUT PASSAGE & ALARM

The closed checkout passage allows for the detection of clients when the checkout is closed. The antenna's red light then goes on.

The closed checkout passage alarm is activated manually by the cashier when they close.

EAS ANTENNA

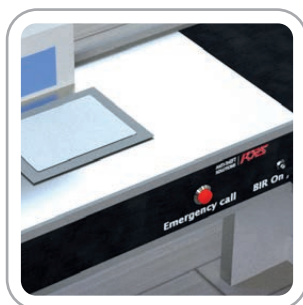

The connected Orchestra antenna allows access to FORScloud services (see p.13)

BACKLIGHTING

Permanent blue light effect and red alarm.

CALL BUTTON

It allows the cashier to call security in case of issue.

BEEPER

Intended for the security staff, the beeper allows to receive all the alarms to be able to react fast (closed checkout alarm, badge detection, cashier call...)

EAS SOLUTIONS

FORSCLOUD SOLUTION FOR ORCHESTRA ANTENNAS

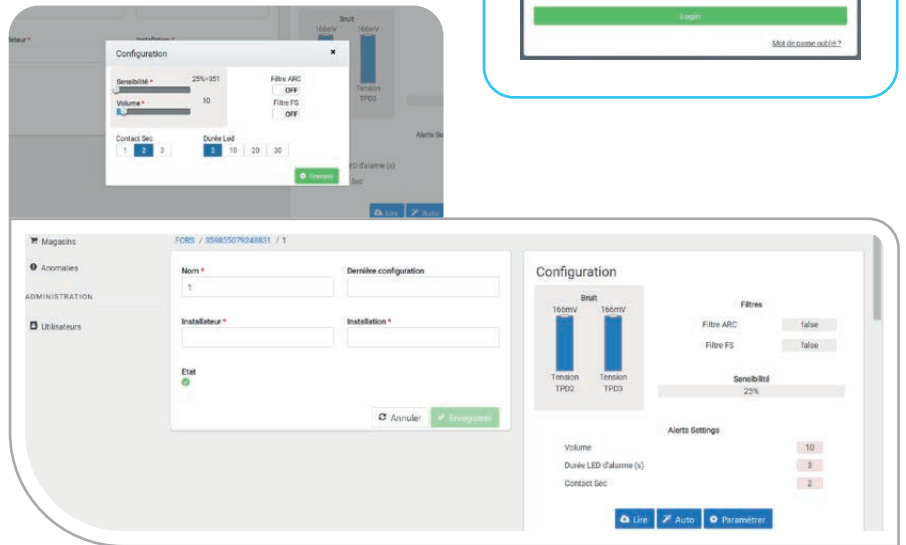

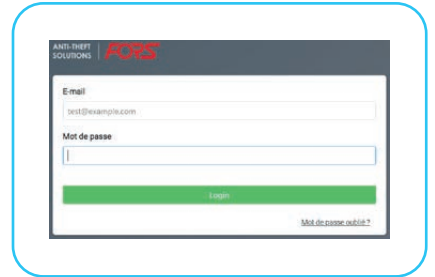

FORSCLOUD

The SmartPulse technology guarantees quality and reliability of the material in time.

Our FORScLoud solution embeds online maintenance and makes feedback easier for store managers.

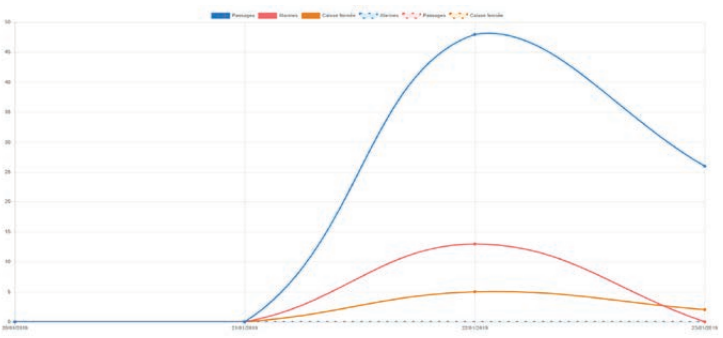

MAINTENANCE

Online Internet maintenance allows our technicians to intervene on all our antennas' set-up, so as to make our customer service more efficient.

REPORTING ANALYSIS

The reporting and analysis offer you a better EAS follow-up of your store no matter where it is in the world.

FORS SERVERS

Our servers allow you to access in real time the data and feedback provided by our antennas on the ground.

EAS SOLUTIONS

RADIO FREQUENCY ANTENNAS

MONO | RF

THE MONO RF SERIES

The radio-frequency detection antennas were specifically designed to adapt to the most challenging environments.

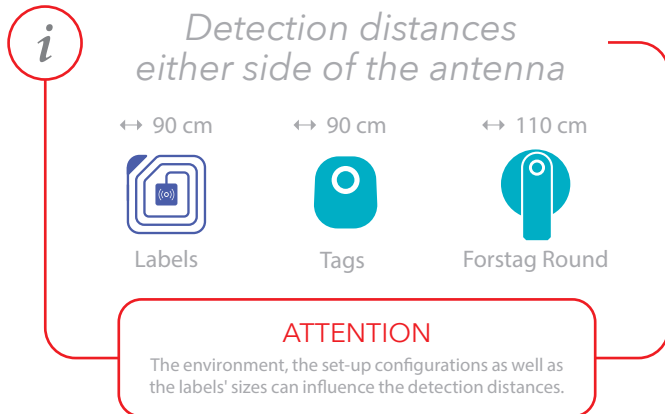

Thanks to the **SmartPulse** technology, the antenna analyses and detects any disturbing element all the while it optimizes detection.

This technology reaches a **detection distance of 2,20m between two antennas** (with the Forstag Round - see p.44).

Once installed, the antenna self-adapts to its environment, hence limiting maintenance costs.

It can easily and perfectly be integrated in supermarkets, hypermarkets, hardware shops, stores or malls...

This series' antennas **work in the 8,2 MHz radiofrequency**, the international frequency for hard adhesive labels. They are compatible with labels from all brands.

Backlighting
Permanent blue light effect and red alarm.

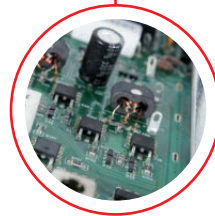

Hood Protection
Metal hood protection in 20/10th metal

Cart Protection
Metal tube and PMMA runner

Alarm
Red backlighting
Adjustable audio alarm

Smartpulse Technology
Last generation DSP with **SmartPulse** technology for a better detection

EAS SOLUTIONS

RADIO FREQUENCY ANTENNAS

DUO | RF

THE DUO RF SERIES

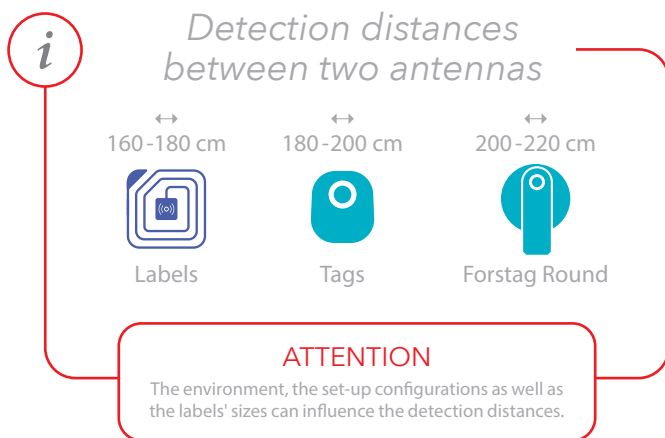

The **Symphony plus** radio-frequency antenna is perfectly adapted to retail stores, allowing for optimum detection between security gates.

Thanks to the **RxTx technology**, the antennas work in pairs (emitting/receiving).

The Symphony Plus series is composed of two models: Symphony Plexi and Symphony Alu. The technology and operation of both these antennas are the same, their only difference being in the design.

This technology allows to reach a **detection distance of 2,20m** between antennas (with the Forstag Round, see p.44).

This series' antennas **work in the 8,2 MHz radiofrequency**, the international frequency for hard adhesive labels. They are compatible with labels from all brands.

Ultra Slim

Only 4 mm thick at the base of the antenna

Design

Transparent PMMA antenna for total discretion

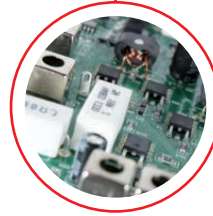

POS advertising

EAS SOLUTIONS

METAL DETECTORS

METAL DETECTION

This antennas series is an additional solution for EAS antennas that allows to **fight boosterbags**.

Boosterbags are used by all organized crime gangs for shoplifting. They use them to prevent labels and tags detection so as not to trigger the EAS alarm when they exit the store with stolen products.

Depending on the environment, we will recommend the **Metalguard** series that detects all boosterbags, whether they are bags, jackets, pockets or baby strollers; or the **Hyperguard** series that also filtrates carts.

These solutions can be embedded to existing antennas or be installed separately.

METALGUARD

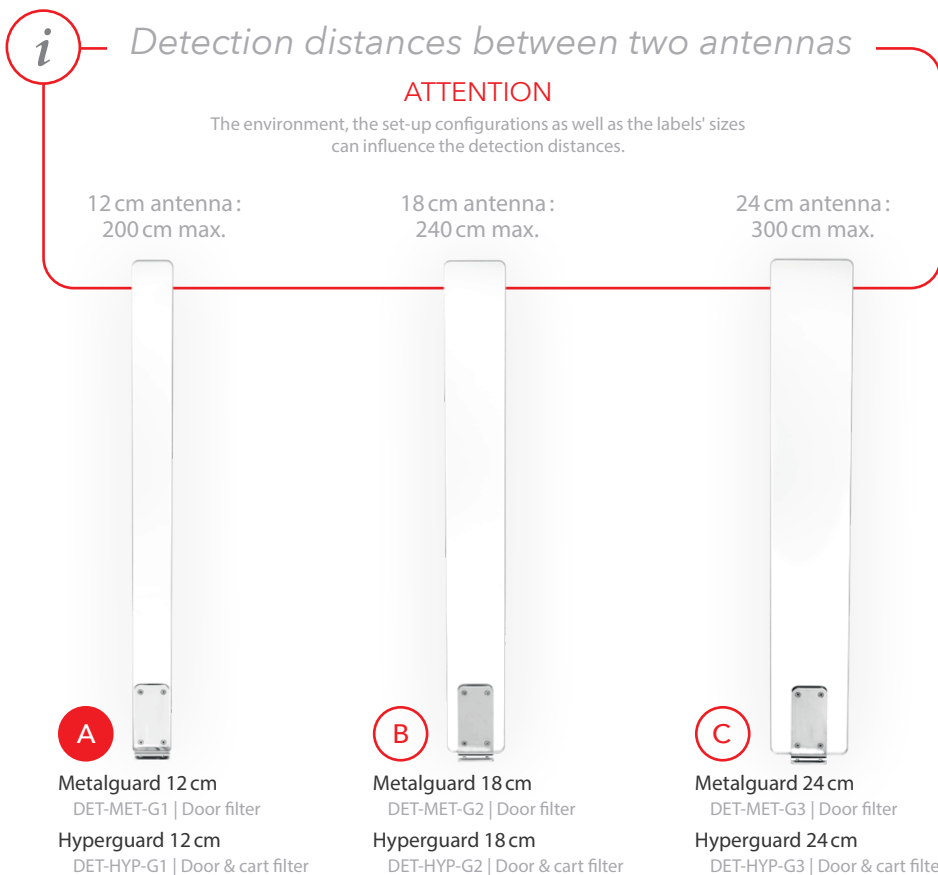

This antennas series detects metal, and most importantly boosterbags, whether they are bags, jackets, pockets or baby strollers.

They include a filter allowing an installation starting 70cm away from a moving door. **This eliminates any false alarm caused by moving doors.**

HYPERGUARD

This series includes all the Metalguard features and also includes a cart filter.

It allows installation in environments with carts and allows passage **without false alarms** (hypermarkets and supermarkets).

EAS SOLUTIONS

MAGNET DETECTORS

MAGNET DETECTION

Apparelguard antennas are installed in fitting rooms for magnetic detection, allowing to

identify illegal magnets before they are used for shoplifting.

Detection distance

Between 2 Apparelguard antennas:
140cm max.

Apparelguard
DET-APP
Magnet detection

ONE UNIQUE CONTROLLER

Metalguard, Hyperguard and Apparelguard solutions can be combined in order to allow for metal and magnet detection within a store. One case only, paired with an adaptable software, can control each of the series for up to 11 antennas.

Controller
DET-CON | 1 for 11 antennas

DEACTIVATOR

FIXED DEACTIVATOR

Fixed deactivators can be installed under the cashier's checkout counter and be connected either to the scanner or a deactivation table or a pad (to place on or under the counter); they deactivate labels at checkout.

This set-up allows the cashier to maintain their work rhythm without disturbance, the label being automatically deactivated when the product is scanned or presented in front of the pad or the deactivation table. In the case of tags, they ring if they're not deactivated.

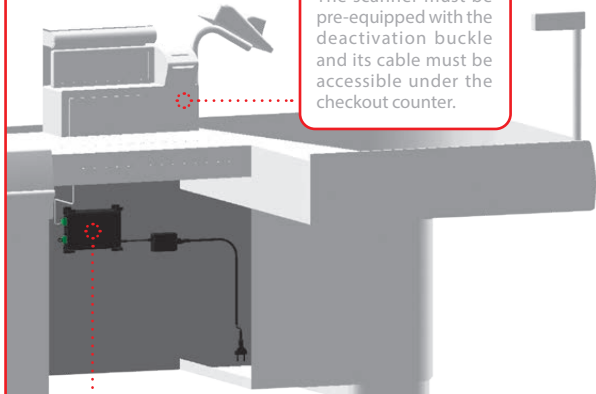

How the deactivation works

STORES WITH SCANNERS (RF)

The buckle is placed around the scanner and allows a deactivation space of 15 cm.

Deactivation buckle

The scanner must be pre-equipped with the deactivation buckle and its cable must be accessible under the checkout counter.

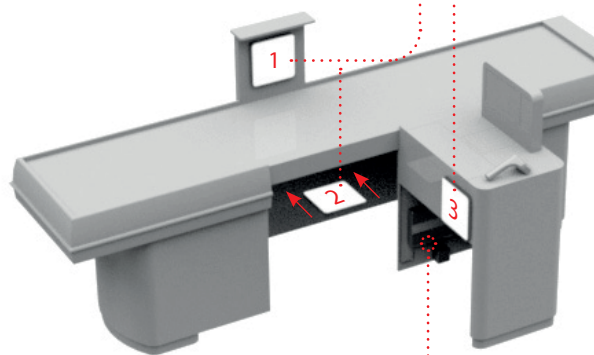

STORES WITH BARCODE READERS (RF & AM)

The buckle is placed in the pad or the deactivation table.

This set-up is adapted to stores equipped with barcode readers only. Deactivation space of 15 cm.

RF Pad - AM Pad - RF deactivation table

They can be placed in either of the 3 different types of store implementation.

Deactivation case fixed under the checkout counter.

Lors de la désactivation de l'étiquette ou du tag (RF ou AM), l'hôtesse de caisse est alertée par un «bip» (volume réglable).

METAL SCANNER : PEOPLE SAFETY

The manual metal detector was conceived to meet the very precise needs of the professionals in people safety.

It was developed to facilitate the research of offensive weapons in the following areas :

- Border security,
- Postal sorting for packages check
- Malls, city halls, schools and public places, show venues, etc.

Specifications

Power: 9V (6F22) Standard or chargeable battery

Frequency: 25KHz

Tension: 9V (6F22)

Weight: 400g (without battery)

Size: 41 (L) x 8 (l) x 4,2 cm (H)

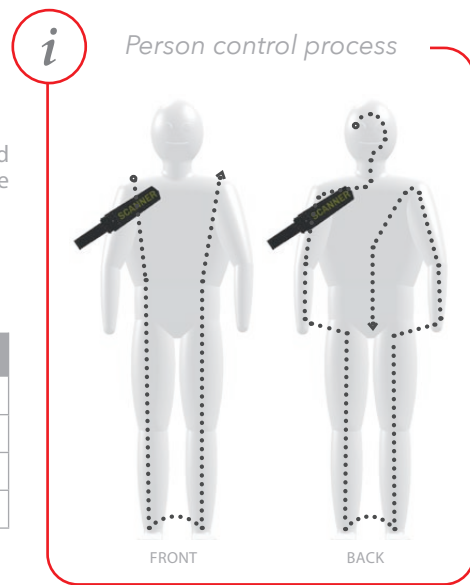

Temperature range for use: -15°C à 55°C

It has a low battery indicator.

The sensitivity of the detector is determined by the size, shape and composition of the object to detect.

Typical performance data states below :

OBJECT	SENSITIVITY
Pin	30 - 60 mm
Coins	75 - 100 mm
15 cm knife	160 - 180 mm
Gun	180 - 195 mm

VIDEO PROTECTION

VIDEO PROTECTION

Our video surveillance system is the indispensable tool to protect your products and staff in-store.

The video coverage of the most sensitive areas strengthens the global security of your store.

Real time surveillance paired with the recording of images allows for great reactivity on shoplifting attempts; it also gives the ability to look back after a theft was discovered. You can also access the images through the mobile application for more convenience.

- IP cameras with night vision
- High resolution up to 1080p
- Long distance WiFi or Ethernet
- Simple to set-up and use
- 360 degrees rotation axis
- Real time visualization
- Remote connection
- Video recording and storage
- Movement detection
- Alert notification

D Video protection pack
KIT-CAM4 | One access box
4 high performance cameras

We offer an all in one pack including 4 high performance cameras and the box to connect them.

Our video system is customizable and allows you to add additional cameras according to your needs.

i

Robustness

- Metal shell
- Waterproof IP66
- Admissible temperatures: -21°C à +56°C
- Can be used outside: the cameras are rain and snow proof.

Simplicity

- Plug and play: the cameras are automatically detected and connected.
- Its 360° rotation axis makes the installation of cameras at the desired locations easy: counter, wall, ceiling...
- Remote access on computer or mobile through the application.
- Confidentiality mask: you can select sensitive areas and areas to ignore so as not to be notified with a false-alarm.
- Smart reading: with customizable research zones, you will save on verification time.

Security

- The 36 infrared LED's and its smart filter guarantee high level pictures day and night.
- Movement detection.
- Automatic storage of the video in case of detection.
- Alert notification on your smartphone or by e-mail including informations in real time to act rapidly.

PEOPLE COUNT

The people count devices offer a measurement of the people flow at the accesses they are set up in.

PEOPLE COUNT ANTENNA

The embedded count device is a simple and efficient option that you can choose on our Orchestra antennas (p. 13).

SMART COUNT DEVICE

- LCD display
- Batteries
- 8 m distance operation

Software included

Functionality of the software provided with the equipment

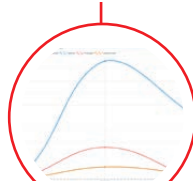

- Automatic download of the count devices statistics (only if the software runs at all times in the background)
- Possibility to manage several devices per shop
- Windows compatible

Easy to use

Wireless USB to recover data on the computer - must be less than 8m from the people count devices

Statistics

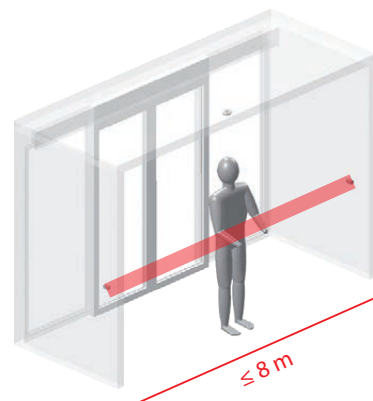

Count Statistics

Statistics in tables or graphics :

- Per hour
- Per week
- Per day
- Per month

A SMART-N
SMART people count device

EAS SOLUTIONS

PEOPLE COUNT

2D CAMERA COUNTER

Economical and precise, the 2D camera counter is the ideal counting solution in stores, visitor centers and indoor public places. It has great advantages :

- Entry and exit counting
- 95% reliability (insensitive to light variations)
- Counting validation by video recording
- Can work by impulsion
- Easy to install (only needs one network cable between entrance and the venue router)
- One month memory
- Must be plugged in
- Can be set-up on ceiling

Software included

B CAMERA-2D
2D camera counter
Must be plugged in
Can be set-up on ceiling

i Detection according to height

Height	Detection width
2,5 m	2,6 m
3,0 m	3,1 m
3,5 m	3,7 m
4,0 m	4,1 m
4,5 m	3,5 m

i Functionalities of the software provided with the equipment

RPOS :
The "real time" software was designed for in-store visualization.

CPOS :
The statistics software allows you to establish daily, weekly, monthly and yearly reports.

REPORTING AND ANALYSIS

Reporting and analysis offer a better follow-up of your store from anywhere. See p.11 for more information on ForsCloud solutions.

GATES GUIDANCE

GUIDANCE AND FLUX CONTROL

EMERGENCY EXIT

Security gates with notches allowing passage in case of emergency

EXIT WITHOUT PURCHASE

The manual security gates for exit without purchase can be controlled with a simple button by your cashier.

The installation of mechanical gates is also a possibility, in the direction you need.

AUTOMATIC GATES

The automatic gates are an economical solution to secure the entrance of your store.

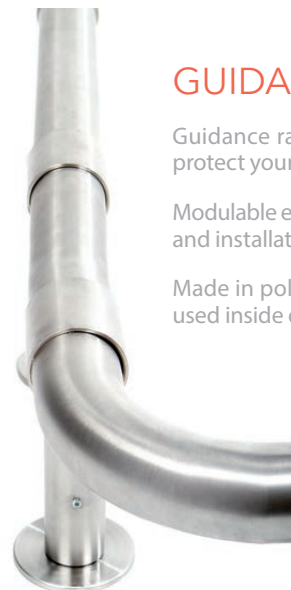

It automatically opens when a client comes close. This new model **Easy Gate NG** includes the latest ITAB innovations.

If someone takes the gates reversely, the alarm sets off.

GUIDANCE BAR

Securing a store entrance or exit is made easier with the chromed guidance bars.

GUIDANCE RAILS

Guidance rails fixed on the ground allow to protect your furniture against cart shocks.

Modulable elements allow for an easy planning and installation.

Made in polished stainless steel, they can be used inside or outside.

GATES GUIDANCE

GUIDANCE AND FLUX CONTROL

SELF-SERVICE SOLUTION

The self-service solution allows the opening of the security gates upon presentation of a barcode printed on the receipt.

This system reduces shoplifting and guarantees a high security level at automatic checkout.

THE EASY GATE NG SOLUTION

It is our latest series, with a practical, robust and modern design.

The new **EasyGate NG** combines the best of the Flexigate and EasyGate standard series all the while benefitting from the latest technology and components on the market.

Its compact format allows for an easy installation, no matter what your store's configuration is.

The **EasyGate NG** was designed to create a perfect harmony between the series products - arms, guidance bars, etc.

The anti-panic function and audio alarm are included, and the alarm sets off if the gates arm is pushed in the anti-panic mode.

THE EASYGATE NG SERIES CAN BE INSTALLED IN THE FOLLOWING CONFIGURATIONS :

- Standard mode (standard automatic opening)
- Welcome mode (open gates that close back if someone goes through reversely)
- Secured mode (double gates)
- Cleaning mode (all doors can be open at once thanks to an optional command panel)

SPECIFICITIES

- Anti-panic function allowing for reversed unlocking of the gates
- 90 degrees arm opening
- Liaison and sync of several gates (by GateCom)
- Adjustable anti-panic power

TECHNICAL DATA

- Opening time: 1,5 s
- Closing time: 2,5 s
- Anti-panic power: 40 to 75 Nm
- Signal type: NPN, 12 VDC
- Settings: anti-panic power, opening and closing times
- Motor powering: 12 VDC
- Power: 230V

RFID SOLUTIONS

OUR GOAL: MAKE THE CUSTOMER'S
BUYING EXPERIENCE BETTER AND
INCREASE SALES IN RETAIL SHOPS
THANKS TO THE RFID TECHNOLOGY.

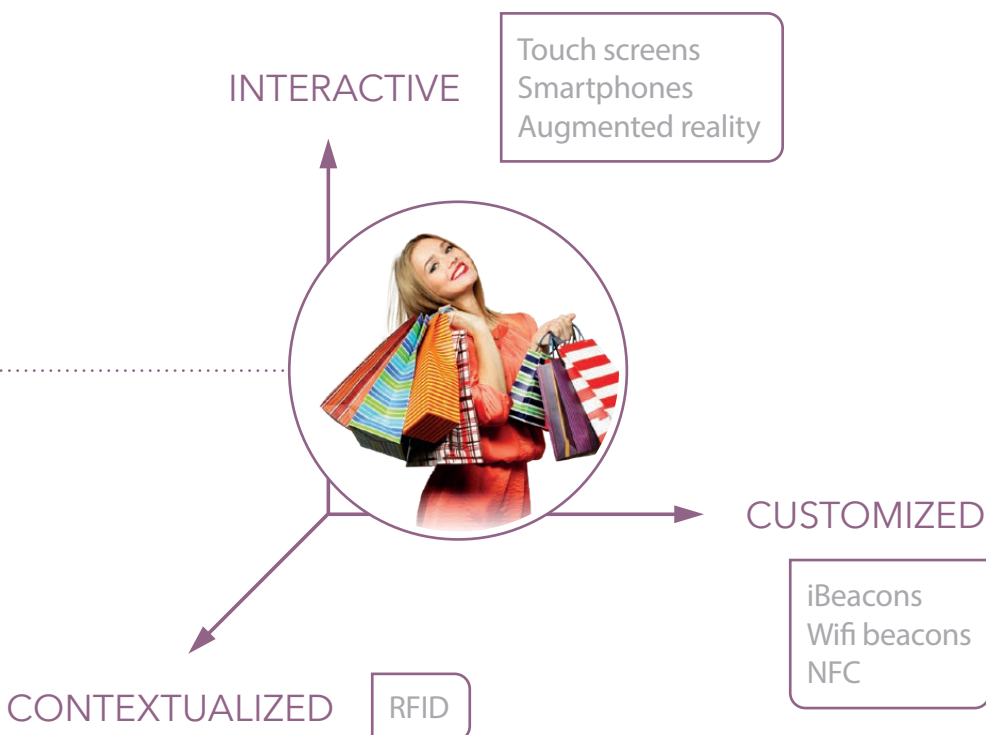

*Associated to other technologies,
the RFID technology is a major
factor in changes to come and is
becoming key for the overall cus-
tomer experience.*

*Thanks to the RFID technology,
the buying process is optimized
and allows the store to increase
profitability.*

*The offer becomes interactive, cus-
tomized and contextualized.*

- Why choose the RFID technology? 30
- Application systems :
 - RFID encoding systems 33
 - Automatic inventory systems 33
 - Interactive sales systems 34
 - Fast checkout systems 34
 - Anti-theft systems 35
 - Cloud based software platform 35
- Global offer 36

WHAT IS THE RFID TECHNOLOGY? WHY IS IT TRULY AN ASSET?

The obstacles met by customers throughout the buying process reduce in-store sales. There are many:

- Gates at the entrance
- Difficulty to find a product
- Sold out products
- Difficulty to see a product
- Difficulty to ask for another size from the fitting room
- Long lines at checkout

The RFID solution reduces these obstacles and makes the buying experience better while increasing sales.

RFID SOLUTIONS

WHY CHOOSE THE RFID TECHNOLOGY?

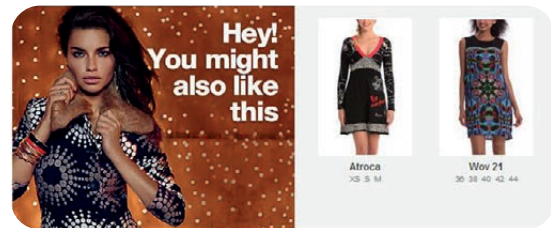

THE RFID TECHNOLOGY ALLOWS CONTEXTUALIZATION

Retailers intensely use websites' recommendations and this causes a great increase in revenue:

Online recommendations are decisive for the purchase decision.

Customers will be more likely to buy if they receive recommendations.

- 770% of the Amazon homepage is dedicated to product recommendations
- 35% of Amazon's sales come from recommendations
- The vast majority of movies watched on Netflix come from recommendations
- On online shops, recommendations increase revenue by 5 to 15%

However, the infrastructure in-store is usually not interactive. It doesn't provide customers with recommendations.

RFID allows to contextualize and bring this new dimension into stores.

THE ADVANTAGES OF THE RFID TECHNOLOGY

For the customer

- Reduces annoying buying experiences
- Provides customized recommendations, avoids lack of information
- Follow-up of the delivery in real time
- Avoids long lines
- Avoids sold-out products

For you

- Flexibility in the store's management (inventory, stock...)
- Use the recommendations to increase your revenue
- Retain customers
- More information on the product
- Easier and more frequent restock
- Wide reach of anti-theft devices
- Identification of stolen products

RFID SOLUTIONS

APPLICATION SYSTEMS

THE RFID SOLUTIONS

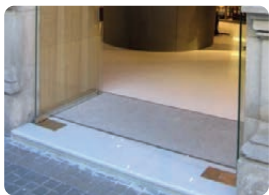

We built a complete series of systems around this technology, allowing to make the customer experience better.

Cloud based software platform

RFID encoding systems

Anti-theft systems

Automatic inventory systems

Fast checkout systems

Interactive sales systems

RFID ENCODING SYSTEMS

Solutions to simply and quickly encode RFID tags: in factory, storages and stores.

ForsPrint

(Android or Windows)

Cloud system for encoding and printing for RFID labels.

ForsStation

Encoding stations for labels and RFID tags.

ForsScan

Mobile reader for encoding.

ForsScan allows to do an RFID inventory thanks to its Android mobile reader, as well as direct download of data in the cloud.

AUTOMATIC INVENTORY SYSTEMS

Inventory systems increase goods availability and reduce losses.

ForsTrack

Overhead systems for real-time inventory.

ForsRobot

Automatic robotic inventory.

ForsShelf

Smart shelves.

RFID SOLUTIONS

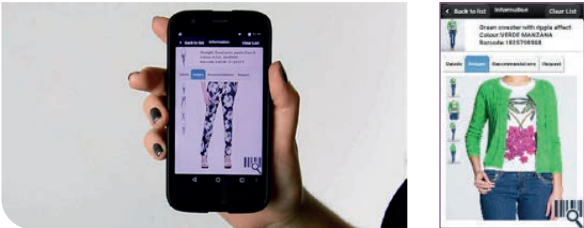

APPLICATION SYSTEMS

INTERACTIVE SALES SYSTEMS

Interactive crossed sales systems make the buying experience better for the customer and increase sales.

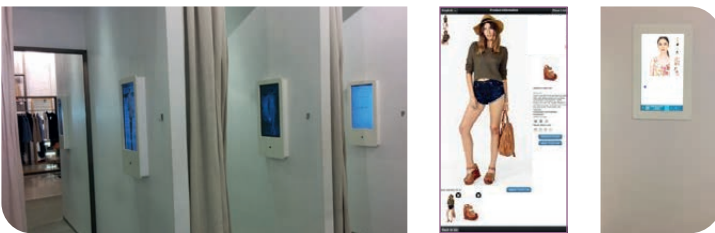

ForsServe

Mobile recommendations systems based on smartphones.

ForsFitting

Interactive fitting rooms systems.

ForsLook

Crossed sales recommendations systems.

ForsMirror

Smart mirror with RFID and augmented reality.

FAST CHECKOUT SYSTEMS

Fast checkout systems make the payment process faster and reduce lines.

ForsPay 110

RFID checkout: reading and writing on RFID labels.

ForsPay 160

Reading/writing checkout points and tag removers.

RFID SOLUTIONS

APPLICATION SYSTEMS

ANTI-THEFT SYSTEMS

These new anti-theft systems make access to stores completely free, which attracts more consumers.

ForsMat

Mat with embedded antennas.

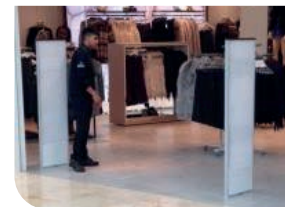

ForsGuard

RFID alarm unit.

ForsGate

RFID gates.

ForsSafe

Overhead anti-theft system.

CLOUD BASED SOFTWARE PLATFORM

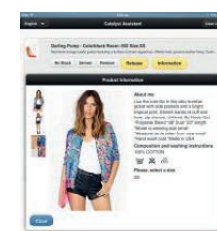

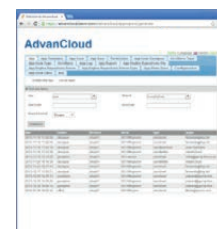

Our RFID systems are managed and controlled remotely through a cloud software platform, that keeps the RFID data as well as customers interactions.

ForsCloud

Web software platform for:

- Controlling systems remotely
- Downloading contents for stores
- Keeping RFID data and customers interactions

Our ForsCloud platform is accessible through a trimestrial subscription.

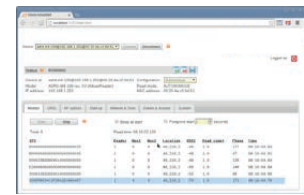

GLOBAL RFID OFFER

The RFID offer has different levels: Components, systems, software drivers, cloud platform and diverse services.

Software tools

- ForsNet API

Software applications

- Monitoring
- Control panels, reports
- Inventory management

Cloud based software platform

- Encoding
- Inventory data

Systems

Material components

Readers

Splitters

Connection cards

Dephasers

RFID SOLUTIONS

GLOBAL OFFER

- ForsNet Manager (web tool configuration)

- Content management

Basic services

- Installation
- Online and on-site maintenance
- Customization of user interface
- Data and content hosting

Optional services

- Content updates
- Software development
- Software integration
- Business intelligence
- Material financing

- Customer interaction
- Content hosting and distribution

- Event archives
- Material control, alerts, firmware updates

Interactive systems

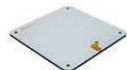

Checkout systems

Anti-theft systems

Multiplexers

Antennas

RF cables and adaptors

Accessories

EAS ACCESSORIES

FORSTAG INNOVATIVE SOLUTIONS

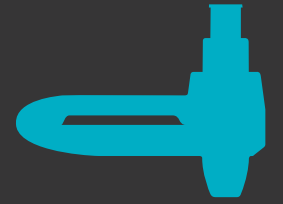

The new ForsTag box introduces the ForsTag concept and its large series.

The ForsTag box presents some of our best-sellers for the Alcohol, Cosmetics, Multimedia and Retail departments to prevent shoplifting.

You can complete it with any equipment assortment presented in this catalogue.

FORSTAG
INNOVATIVE SOLUTIONS

- Labels 40
- Forstag Innovative Solutions 42
- Retail accessories :
 - Forstag solution 44
 - RF tags 46
 - AM tags 47
 - Pins and adjustable anti-theft devices 48
 - Glasses accessory 49
- Food and beverage :
 - Bottles 50
 - Cans and food 54
- Spiders and alarm-equipped anti-theft devices : 56
- Spindle protections : 58
- Tag removers and security levels : 59

EAS ACCESSORIES

LABELS

RF LABELS

To make the detection distance larger, choose the bigger size labels which benefit from a larger electronic circuit.

The Fors radio frequency anti-theft labels benefit from an excellent detection rate.

A Label 3x3 White
RF3-DB | Deactivable

B Label 4x3 White
RF43-DB | Deactivable

C Label 4x4 White
RF4-DB | Deactivable
RF4-NDCB | Non Deactivable

D Label 5x5 White
RF5-DB | Deactivable
RF5-NDCB | Non Deactivable

E Label 3x3 Bar code

FORSTAG INNOVATIVE SOLUTIONS

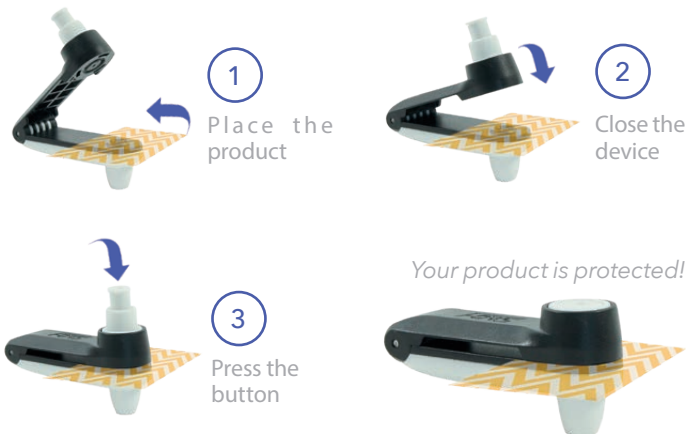

FORSTAG INNOVATIVE SOLUTIONS

The all-in-one solution to protect your products

HOW TO USE THE FORSTAG

Simple and quick locking process

Instantaneous unlocking

When the unlocking device touches the tag, it's instantaneously unlocked.

Strengths of the Forstag

SMART DESIGN

- Discreet, beautiful and ready to use
- Possibility to customize the series for large orders
- All-in-one system (pin + pliers + detection):
 - Less separate items loss
 - Unique storage basket at checkout and in the back office
- Retractable pin to avoid injury
- Locking and unlocking simple and fast:
 - Forstag can be installed with one hand only
 - Time-saving
- Products delivered unlocked
- FORS exclusive patent

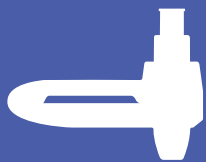

RESPECT OF THE PRODUCTS

- Smooth pin so as not to damage the clothes
- Possibility to protect specific products thanks to a notch. Great for belts, cables, braces, lingerie, etc.

SECURITY

- RF, AM or RFID Technology
- 3 levels of security available with standard, super-lock or hyper-lock magnetic system (more information p. 59)

AN ECONOMICAL SOLUTION

More productivity

Because it is so easy to use, the FORSTAG series offers stores staff more security, which in returns causes better efficiency daily.

More comfort in fastidious and repetitive tasks leads to a better productivity.

Global cost: investment, workforce costs and economy rates over 5 years

HYGIENE AND SECURITY: RETRACTABLE PIN

We all know it, manipulating anti-theft pins causes security and hygiene issues for staff.

In its open position, the Forstag pin is invisible: this innovation allows staff to manipulate the product without risking an injury.

To lock the Forstag, simply press the button.

CLOU-19C | 19 mm

E Notched pin rounded head
CLOU16C-TB | 16 mm

F Notched pin black plastic head
CLOU16C-TPN | 16 mm

SPECIALIZED PINS

The ink pin secures clothing: if the shoplifter tries to pull the item, the ink frees indelible ink that makes it unusable and unsellable for the thief. It is very efficiently dissuasive and adds more protection for textiles of high value.

The alarm pin secures clothes against theft. When the shoplifter pulls it, that sets off the alarm, which alerts the store in a very efficient manner.

The Lanyard efficiently protects products such as handbags, shoes, bikes, rackets, etc. Its buckle allows not to pierce the products it protects.

PROTECTION FOR BOTTLES AND LIQUORS

UNIVERSAL ALCOHOL FORSTAG

The Forstag alcohol was designed in order to facilitate putting and removing the anti-theft device at checkout, all the while adapting to all bottle types (wines, champagnes and liquors).

Its ergonomics allows optimum tightness and the Forstag Alcohol efficiently protects 99% of the bottles on the market.

EAS ACCESSORIES

ANTI-THEFT DEVICES FOR FOOD

CANS

can-tag™ 1, 2 and 4

Because they are in high demand, energy and/or alcoholic drinks in cans suffer more and more from shoplifting.

The Faraday cage effect linked to the aluminium metal on RF and AM labels makes it impossible to detect these products with EAS systems at checkout.

With the can-tag™ 1, 2 and 4, Fors offers an efficient, fitting and economical solution.

The amortization of the investment in the CAN-TAG is guaranteed:

- By eradicating the growing phenomenon of in-store consuming
- By suppressing self-service cans shoplifting

Return on investment guaranteed in less than three months:

Return on investment on can-tag in an 800 sq meters store:

- Purchase of 1000 can-tags per 1,35 EUR before tax = 1350 EUR before tax
- Monthly losses for cans: beers, energy drinks, premix: 700 EUR before tax per month = 29 EUR before tax daily
- Amount of protected cans sold per day: 120 units
- Putting-on 120 can-tags: 6 seconds x 120 units = 12mn per day

Break-even point with a 5 year amortization rate:

- Investment amortization:
 $1350 \text{ EUR} / 60 \text{ months} / 25 \text{ working days} = 0,90 \text{ EUR}$
- Workforce cost for 12 minutes:
 $16 \text{ EUR} / 60 \text{ mn} * 12 \text{ mn} = 3,20 \text{ EUR}$
- Daily savings with can-tag: 24,90 EUR
- Break-even point: $1350 / 24,90 = 55 \text{ exploitation days ie } 2,16 \text{ months.}$

PROTECTION CASES

ALARM CASES

ALARM CASES

A level of security never reached before !

ROBUSTNESS AND SECURITY

The alarm trigger has **4 points of protection**: 3 for locking and 1 as an alarm system, unreachable, allowing maximum security for the protected products.

An RF (radio frequency) or AM (magneto acoustic) ferrite is embedded. You can also stick 75mm EM (electro magnetic) labels inside the case.

Any fraudulent opening of the case instantly sets off the alarm, which alerts the personnel.

The alarm trigger detects the presence of magnets. If a magnet is brought close to it, the alarm sets off after 3 seconds, for a duration of 10 seconds, which alerts the staff on a possible shoplifting attempt.

This buffer time allows the staff to deactivate the case without triggering the alarm too soon.

The 4P deactivator opens the case and simultaneously deactivates the alarm system.

SIMPLE TO USE :

The locking and activation of the alarm are done by pressing both buttons on the trigger.

Thanks to the Fors 4P deactivator, the deactivation of the alarm is easier at checkout for the staff: **it only takes one move.**

The light goes on when the alarm is activated and then blinks.

Takes **minimum space**: the trigger alarm doesn't take more space than any other type of trigger. Must take into account that the available height inside the case is reduced by 13mm.

Alarm triggers are **reusable**.

FEATURES

- Trigger material: polycarbonate (very resistant)
- Alarm 95 dB
- Replaceable battery: CR 2450
- Battery life: 3 years active (without an alarm)
- Battery life with activated alarm: around 3 days
- Resists tough environments: cold, water drops, etc.

MODELS & STANDARDS

- Patented Locking system
- RoHS compliant
- CE Certification

ADAPTABILITY

The alarm trigger adapts to a large amount of Fors cases.

You can replace old triggers on your cases with these ones.

This pictogram allows you to easily see which cases have the alarm option.

The essential solution to protect your products against shoplifting

Trigger alarm V3

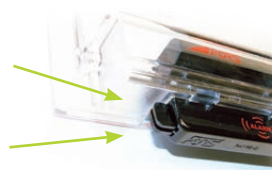

Trigger alarm V2

5-4 deactivator

TO CLOSE THE CASE

To close the case, press both buttons simultaneously. You will hear a beep and the light will go on, confirming the alarm is activated.

TO OPEN THE CASE

To unlock the case, insert it in the deactivator following the indications on the picture.

APPLE PRODUCTS

Please see our selection of devices adapted to Apple products. Due to their high specificity however, we recommend that we get in touch with our team for a specific analysis.

Do not hesitate to consult with us.

Spider
Large spider

Spidercon
Console net spider

The other Apple products such as Macbook, Air, Pro, keyboards or iMac are sizeable products with a high added value that need to include protection before they are put on display in self-service.

All the formats of these products do not allow to integrate a protection case, however the spiders fit well. **For more information on spiders: see p. 56.**

PROTECTION CASES

HYGIENE AND BEAUTY

RAZORS AND BLADES

Since razor blades packaging is cardboard, they are easily stealable.

The LAM cases prevent this from happening and efficiently protect them against shoplifting. The LAM 05 and LAM 07 cases are perfect for spindles and rack displays.

Cases that protect the razor itself are also available.

TOUCH DISPLAY

CABLES AND LOCKING SPINDLES

With our accessories range, raising up your level of security has never been so easy.

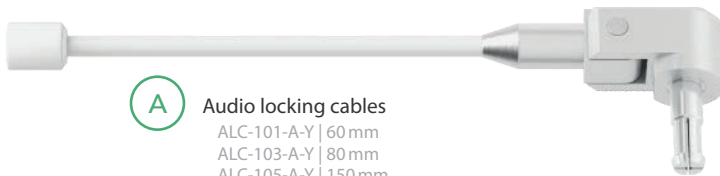

AUDIO LOCK

The 3,5mm patented audio locking mechanism offers maximum security (538LB).

The remodeled lock displays a slick look thanks to its light aluminium

structure, nonetheless very resistant.

It benefits from a 180° pivotal movement that allows to hide the cable.

- A** Audio locking cables
- ALC-101-A-Y | 60 mm
 - ALC-103-A-Y | 80 mm
 - ALC-105-A-Y | 150 mm
 - ALC-107-A-Y | 190 mm
 - ALC-109-A-Y | 350 mm

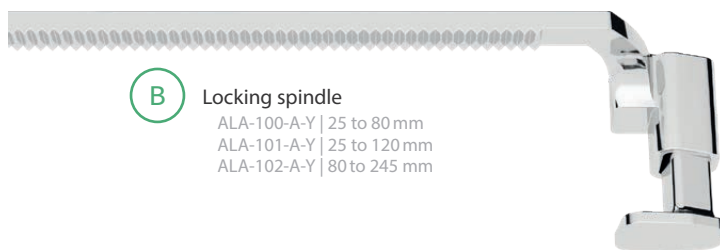

LOCKING SPINDLES

They were created from a unique aluminium piece to make them even thinner, light and secured.

The surface is polished with a superior gloss in order to limit its visual aspect.

We have integrated our tetrahedral key to safely control the arm locks in order to obtain a perfect fit.

Three version are available for smartphones, phablets and tablets.

- B** Locking spindle
- ALA-100-A-Y | 25 to 80 mm
 - ALA-101-A-Y | 25 to 120 mm
 - ALA-102-A-Y | 80 to 245 mm

TOUCH DISPLAY

LOOP AND SPLITTER SERIES

Loop 2 series

Splitter 2 series

STRONG, ELEGANT, DISCREET AND POLYVALENT

At the heart of these two series is the brand new **adjustable pendant**.

Easily modify the buckle circumference so it precisely matches the size of the device to protect.

When closed, the pendant firmly tightens the cable to prevent any movement.

The **Loop 2** aeronautic-quality steel cable can resist a breaking force up to 295 kg. It is also protected by its reinforced-steel sheath.

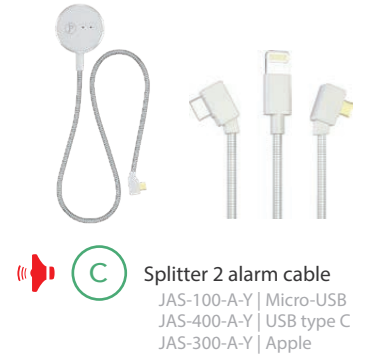

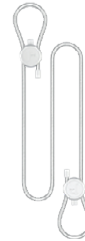

The **Splitter 2** is based on the same principle, with a power cable shielded by a steel sheath and an **alarm** that goes on if it is severed or unplugged.

A Loop 2 cable
JLP-200-A-Y | With clip

B Double Loop 2 cable
JLP-220-A-Y | Double pendant

C Splitter 2 alarm cable
JAS-100-A-Y | Micro-USB
JAS-400-A-Y | USB type C
JAS-300-A-Y | Apple

Mounting options

Self-adhesive

Buckle

Screw

These series are polyvalent and modular, compatible with each other as well as with the audio-locking cable (see p.93).

SECURE THE IMPOSSIBLE

Loop 2 and Splitter 2 can secure all forms and sizes. They offer an excellent protection even of big devices.

D Pendant lock
ACP-103-A-Y | Adjustable

	FORS Reference	Product Name	Dimensions (mm)	Package List	Package Weight
A	JLP-200-A-Y	Loop 2 cable	1000 mm	Unit	0,25 kg
B	JLP-220-A-Y	Double Loop 2 cable	1000 mm	Unit	0,25 kg
C	JAS-100-A-Y	Micro-USB Splitter 2 cable	1000 mm	Unit	0,20 kg

MECHANICAL PROTECTIONS

MECHANICAL PROTECTION FOR LAPTOP

ProtecOrdi allows to protect laptop computers.

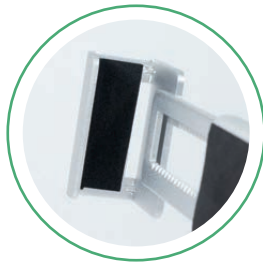

The adjustable arms offer a protection for all models on the market. The set-up up can be done directly by the shop staff.

Protection breaks

Lock

17 to 41 cm adjustable arms

- Fast and simple set-up
- Aluminium
- Mechanical protection

A Computer protection
PROTECORDI | Aluminium

MECHANICAL PROTECTION FOR TABLETS

Built in metal, the ProtecTab is the most secure solution to mechanically protect your tablets in-store while letting your products in display.

The client can rotate the tablet from portrait to landscape mode thanks to its rotation axis.

B 8 to 12" tablet protection
CTAB-COR1 | From 21 to 31 cm diagonal

C 12 to 16" tablet protection
CTAB-COR2 | From 30 to 41 cm diagonal

D Base for tablet protection
CTAB-S30

- Fast and simple set-up
- 2 adjustable arms designs
- Free 90° rotation of the product
- Great robustness

	FORS Reference	Product Name	Protected Products	Package List	Package Weight
A	PROTECORDI	Adjustable aluminium ProtecOrdi	From 17 to 41 cm wide computer	1	16,7 kg
B	CTAB-COR1	ProtecTab small model	From 21 to 31 cm diagonal tablet	1	3,5 kg
C	CTAB-COR2	ProtecTab large model	From 30 to 41 cm diagonal tablet	1	5,8 kg
D	CTAB-S30	ProtecTab base		1	4,4 kg

LISTENING STATIONS

LISTENING STATIONS

LISTENING STATIONS

For more than 30 years, Fors has been developing listening stations for specialized stores, libraries and media libraries...

Our reputation was built on the robustness of our products and on our Fors Prestige anti-vandalism headset, designed to endure uninterrupted use in a public space.

i *Sturdiness*

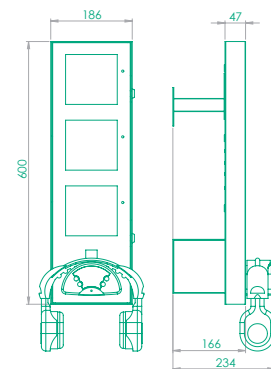

- Anti-corrosion paint
- Anti-vandalism Fors Prestige headset
- Protections plates for displayed CDs
- Anti-vandal buttons and sheath

CD LISTENING STATION

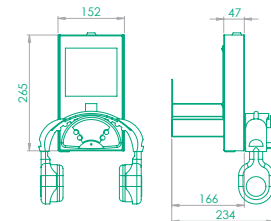

- 1 to 3 CD set-up: TOP promotion / new items in the catalogue.
- Minimum bulk.
- 2 min limitation for each track.

i *Easy to use*

- Automatic play as the headset is taken off its support, thanks to the photoelectric cell, and a simple pressure on the CD cover.
- Possibility to set-up track forward / back and sound.
- Luminous display of the soundtrack number.
- Fast CD change for the store staff.

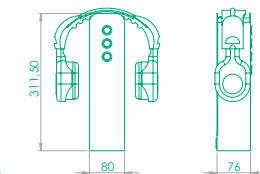

A Multi listening post (3 CDs)
PE3CD

B Monolux listening post (1 CD)
PE1CD

MP3 LISTENING STATION

- MP3 files stored on a memory stick (provided). Minimum bulk.
- Play/Pause buttons (no automatic play when headset are taken off the support).
- Two functions buttons:
Short pressure: track change.
Long pressure: volume adjustment.
- Mounting of the listening station by screw (not provided), directly on the table or counter.

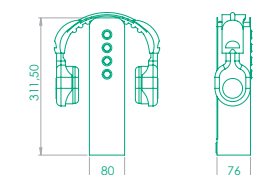

C MP3 listening post
PEMP3

ON DEMAND LISTENING STATION

This listening station allows the client to listen to all CDs at the counter, with the help of staff.

- Track change and volume adjustment is made by the user.

FORS PRESTIGE HEADSET

The Prestige headset is patented and was designed in very durable and "anti-vandalism" materials and sheath.

The sanitary cushions are interchangeable (sold by pair).

This headset is ideal for use in high affluence areas (stores, libraries, museums).

E Prestige headset
CASQUE-PRE

F Replacement cushions
CASQUE-COUSS

Anti-vandalism reinforced plastic

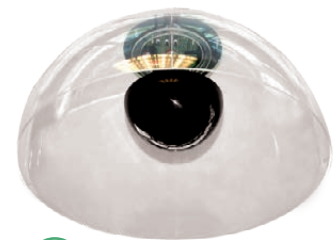

Stainless steel cable (1 m)

PARABOLIC SPEAKER

Listening comfort and sound quality

- Good sound quality
- No need for a headset: no sanitary issue, as could appear with time of use
- Sound isolation under the parabola and absolute movement freedom
- Customized listening (1 to 2 persons) with no sound disturbance on the surrounding environment.
- Integrated amplifier in the dome. Jack plug-in (5m cable provided).
